

Manual Bag Opening Station

Manual Bag Opening Stations offer a dust-free workspace, featuring an integrated filtering system. Tailored for versatility, these stations are available in stainless or carbon steel options, making them adaptable across various sectors.

Components include a robust stainless or carbon steel body, a bunker with a flange designed for the SVQ200 slide gate, and a highly efficient filtering system with a substantial 10m² filtering area. Equipped with 40 elliptical bags, the station provides options for 0.75kW and 1.1kW suction fans. The hinged lid, coupled with limit switches, ensures easy and safe operation, reflecting a commitment to both efficiency and user safety.

Manual Bag Opening Stations provide dust free working environments with included filtering system. With stainless and carbon steel component options, it is suitable for every sector.

COMPONENTS

- Stainless – carbon steel body options
- Bunker with flange for SVQ200 slide gate
- Filtering system with 10m² filtering area
- 40 pcs of elliptical bags
- 0.75kW and 1.1kW suction fan options
- Hinged lid with limit switches
